

CampusBite — Software Design Diagrams

University Project Documentation / System Design

1. System Architecture Diagram

Shows the interaction between the Student Interface, Owner Dashboard, Frontend Web App, REST API Backend, Socket.IO Service, and the Supabase PostgreSQL Database across three layers: Presentation, Application, and Data.

 System Architecture Diagram

2. Use Case Diagram

Shows the two actors — Student and Vendor/Owner — and the use cases each interacts with inside the CampusBite system boundary.

 Use Case Diagram

3. Activity Diagram — Food Ordering Process

Shows the step-by-step ordering workflow from opening the platform to the student collecting their food, including vendor accept/reject decision points.

 Activity Diagram

4. Component / Solution Diagram

Shows the major system modules — Student Panel, Vendor Dashboard, Authentication System, Menu Management, Cart System, Order Processing, and Database Layer — and how they connect.

 Component Diagram
